

Join our Team in Hamburg at the earliest possible date as **Intern (m/f/d) Quality Assurance Engineer (Software Development)**

Within a team of 5, your main task will be:

- Modify existing software to correct errors or to improve its performance.
- Analyze user needs and software requirements to determine feasibility of design within time and cost constraints.
- Confer with systems analysts, engineers, programmers and others to design system and to obtain information on project limitations and capabilities, performance requirements and interfaces.
- Store, retrieve, and manipulate data for analysis of system capabilities and requirements.

Required Skills:

- Determining how a system should work and how changes in conditions, operations, and the environment will affect outcomes.
- Identifying measures or indicators of system performance and the actions needed to improve or correct performance, relative to the goals of the system.
- Considering the relative costs and benefits of potential actions to choose the most appropriate one.
- Agile project management skills are welcome
- First experience with JIRA, Sketch, Gitlab etc. would be beneficial

We offer mandatory internships as well as voluntary internships. Combining a voluntary internship with a mandatory internship is possible. **You have to be available for at least 3-4 months.**

No formal covering letter required. It's best to apply via email at mayntz@advise-mc.com. Our colleague **Christian Mayntz** is happy to answer any additional questions. Kindly get in touch via LinkedIn or Xing.

We are looking forward to your application!
